

THE QUICK WAY TO OPTIMAL EFFICIENCY

FOR TUBES 1" I.D. AND UP

CE certification only applies to RAM-4X 50 Hz model.

RAM-4X and RAM-4X2A Turbine Action

It doesn't take long for heavy buildup of scale and soot to form in firetube boilers resulting in wasteful fuel consumption. Thorough and frequent cleaning is necessary to maintain performance and increase efficiency.

Both the RAM-4X and the RAM-4X2A use the same trusted technology as the popular RAM-4 unit to clean larger I.D. boiler tubes. Powerful turbine action does the dirty work.

With a variety of brushes and cleaning tools to choose from, these units make any boiler-cleaning operation an easy, one-person job that pays dividends in increased efficiency.

FEATURES

- Stainless steel construction
- Interchangeable cleaning tools
- Integrated dolly
- Simultaneous water flush or vacuum
- Foot switch activation
- Updated design, with intuitive and easy-to-use controls

DRY PICKUP ATTACHMENT

The GTC-DPA can be used with the RAM-4X, RAM-4X2A, AWT-100 and AWT-100X Tube cleaners for the recovery of dry deposits. After connecting the vacuum (see page 21) the operator simply inserts a special dry application flexible shaft (GTC-721G or GTC-821) through the Dry Pickup Attachment and into the tube. While the operator feeds the rotating shaft through the tube, the cleaning tool breaks up deposits which are immediately pulled into the vacuum drum.

GTC-DPA: Dry Pickup Attachment, including 2" x 12' hose with quick connect fitting (order nozzle below)..... **Call for Price**
